

Model My Pay

Purpose: Model My Pay allows you to view an estimate of your pay after applying *hypothetical* changes to your taxes, earnings, and deductions. You can use a separate calculation to *view a Gross to Net approximation* based on these changes. This enables you to determine how changes may affect your pay.

Click **Model My Pay** and select **Payment Date** to make the adjustments too.

Model My Pay

Select your company, position and payment date from your available results to start your model.

Sample: If I increase my 401(k) pre tax deduction from 11% to 15%, what effect does that have on my paycheck?

Click **blue arrow** next to the **Pre Tax Deductions**, enter 0.15 in the **Adjusted Value** field and select Model.

Reference Pay

Company: Martin's Point Health Care Position:

Pay Period: Jan 7, 2023 - Jan 20, 2023 Gross Pay: 1,689.20

Payment Date: Jan 26, 2023 Net Pay: 1,186.89

Modeling Options

Expand sections below as needed and enter new values in the Adjusted Value column. Click the Adjust Federal Taxes and Adjust State Taxes buttons to make changes to your tax elections. If you don't enter a start date and end date when adding new rows to earnings or deductions, the period start date and end dates are used by default. When finished, click the Model button to run a calculation that compares your changes to your original pay.

> Earnings: 1,729.20

Pre Tax Deductions: 303.13

			Input Details	
Description	Additional Information	Type	Current Value	Adjusted Value
